# Use questioning techniques when delivering customer service

---

### Overview

This Standard is part of the Customer Service Theme of Delivery. This Theme covers Customer Service behaviours and processes that have most effect on the customer experience during Customer Service delivery. Remember that customers include everyone you provide a service to. They may be external to your organisation or they may be internal customers.

This Standard is about how you use questioning both in planned sequences and in spontaneous conversation to paint a picture of what your customer wants and how your organisation can deliver it. This Standard is for you if you come into contact with your customer face to face, by voice technology or on-line with immediate interaction. This Standard is probably not for you if you deal with customers remotely when it takes time to exchange questions and responses.
