
Overview

The main outcome of this activity is the delivery of a radiation protection programme, which will cover relevant aspects of radiation protection for different groups of workers.

This activity includes confirming the learning outcomes required by the radiation protection training programme; selecting and delivering training methods; providing colleagues with learning opportunities; encouraging learners' development with constructive feedback; reviewing colleagues' development needs, and providing options for improving their performance.

This activity is likely to be undertaken by someone whose work role is exercised in an environment where radiation protection is important.

This unit deals with the following:

- 1 Deliver radiation protection training programmes

During this work you must take account of the relevant worksite operational requirements, procedures and safe working practices AS THEY APPLY TO YOU.

Previous Version:

Adapted from Unit N222 of Radiation Protection NOS – version February 2006.

Performance criteria

- You must be able to:*
- P1 confirm the learning outcomes required by the radiation protection training programme
 - P2 select appropriate training methods to deliver specific learning outcomes to colleagues
 - P3 ensure the training methods comply with all relevant regulations and standards for radiation protection
 - P4 deliver the training methods effectively in accordance with the requirements of the radiation protection training programme
 - P5 provide colleagues with suitable learning opportunities to enable them to improve their knowledge and understanding of radiation protection
 - P6 encourage colleagues to maintain their knowledge of radiation protection
 - P7 provide colleagues with constructive feedback on their performance during the training
 - P8 review the development needs of colleagues at regular intervals
 - P9 provide colleagues who are not able to improve their performance with suitable options
 - P10 comply with all relevant regulations and standards, and record all relevant actions and outcomes in the appropriate information systems
