

## Arrange transport scheduling for delivery of livestock in operations

### Overview

This standard covers the skills and knowledge needed to arrange transport scheduling for delivery of livestock in operations.

You must understand how to and show you can produce transport scheduling plans, identify the livestock and their locations for collection purposes and communicate the information to the relevant people. You will need to understand how to and show you can make and monitor transportation arrangements, provide delivery schedules, and recommend remedial action when difficulties are encountered.

This standard is for you if you work in food operations and the associated supply operations and your role requires you to provide pre-slaughter care of livestock.

## Arrange transport scheduling for delivery of livestock in operations

**Performance criteria**

You must be able to:

**Gather information, produce and arrange transport schedule plans**

1. produce transport scheduling plans for the collection of livestock in the required format and at the appropriate time, for agreement with the relevant person(s)
2. identify the livestock available for collection and their location, and collate and communicate the information to the relevant person(s)
3. arrange transport with relevant person(s) to meet operational requirements in a way which promotes goodwill and trust
4. provide delivery schedules to the relevant person(s) in accordance with company procedure

**Monitor processes and transport schedules**

5. monitor deliveries received against the transport schedules and recommend relevant remedial actions where difficulties are encountered
6. develop transport vehicle cleaning schedules which are in line with safety and hygiene regulations and communicate these to the relevant person(s)
7. check that transport schedules are in line with legal requirements
8. complete the documentation in compliance with company procedure and make it available to the relevant person(s)

## Arrange transport scheduling for delivery of livestock in operations
