

Install composite strengthening systems

Overview

This standard is about installing composite strengthening systems, interpreting information, adopting safe, healthy and environmentally responsible work practices, and selecting, preparing and using materials, components, tools and associated equipment

This standard is for people working in the occupational area of specialist concrete and can be used by operatives, supervisors and managers

Performance criteria

- You must be able to:*
- P1 interpret the given information relating to the work and resources to confirm its relevance
 - P2 comply with the given, relevant legislation and official guidance to carry out your work and maintain safe and healthy work practices
 - P3 select the required quantity and quality of resources for the methods of work
 - P4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
 - P5 comply with the given contract information to carry out the work efficiently to the required specification
 - P6 complete the work within the allocated time, in accordance with the programme of work

Knowledge and understanding

You need to know and understand: **Performance Criteria 1**

Interpretation of information

K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented

K2 the types of **information**, their source and how they are interpreted

K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2

Safe work practices

K4 the level of understanding operatives must have of **information** for relevant, current **legislation and official guidance** and how it is applied

K5 the types of **fire extinguishers** and how and when they are used

K6 how **emergencies** should be responded to and who should respond

K7 the organisational **security procedures** for tools, equipment and personal belongings

K8 what the accident reporting procedures are and who is responsible for making the report

K9 why, when and how **health and safety control equipment** should be used

K10 how to comply with environmentally responsible work practices to meet the requirements of current **legislation and official guidance**

Performance Criteria 3

Selection of resources

K11 the characteristics, quality, uses, sustainability, limitations and defects associated with the **resources** and how defects should be rectified

K12 how the **resources** should be used and how any **problems** associated with the **resources** are reported

K13 the organisational procedures to select **resources**, why they have been developed and how they are used

K14 the **hazards** associated with the **resources** and **methods of work** and how they are overcome

Performance Criteria 4

Minimise the risk of damage

K15 how to **protect work** from damage and the purpose of protection

K16 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 5

Meet the contract specification

K17 how **methods of work**, to meet the specification, are carried out and **problems** reported

K18 how **maintenance** of tools and equipment is carried out

Performance Criteria 6

Allocated time

K19 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range**Performance Criteria 1**

1 interpretation of drawings, specifications, schedules, method statements, risk assessments and manufacturers' information related to the work to be carried out

Performance Criteria 2

2 avoidance of risk by complying with the given information relating to the following

2.1 methods of work

2.2 safe use of health and safety control equipment

2.3 safe use of access equipment

2.4 safe use, storage and handling of materials, tools and equipment

2.5 specific risks to health relating to operatives and other personnel

Performance Criteria 3

3 selection of resources associated with own work

3.1 materials, components and fixings

3.2 tools and equipment

Performance Criteria 4

4 protection of the work and its surrounding area from damage

5 maintain a clear and tidy work space

6 disposal of waste in accordance with current legislation

Performance Criteria 5

7 demonstration of work skills to measure, mark out, protect, prepare, test, record and report

8 use and maintain hand tools, portable power tools and ancillary equipment

9 install two of the following composite strengthening systems to given working instructions

9.1 carbon fibre wrap

9.2 carbon fibre plates

9.3 carbon fibre rods

9.4 aramid wraps

Performance Criteria 6

10 safe completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Install composite strengthening systems

Scope/range related to knowledge and understanding

Disposal of waste

1 environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

Emergencies

2 operative's response to situations in accordance with organisational authorisation and personal skills when involved with

2.1 fires, spillages, injuries

2.2 emergencies relating to occupational activities

Fire extinguishers

3 water, CO₂, foam, powder and their uses

Hazards

4 those identified by Control of Substances Hazardous to Health (COSHH), risk assessments, methods of work, manufacturers' technical information, statutory regulations and official guidance

Health and safety control equipment

5 identified by the principles of prevention for occupational use, types and purpose of each type, work situations and general work environment

5.1 collective protective measures

5.2 local exhaust ventilation (LEV)

5.3 personal protective equipment (PPE)

5.4 respiratory protective equipment (RPE)

Information

6 drawings, specifications, current legislation, schedules, method statements, risk assessments, electronic data, manufacturers' information, official guidance and current regulations associated with installing composite strengthening systems

Legislation and official guidance

7 this relates to the operative's responsibilities regarding duty of care legislation, potential accidents, health hazards and the environment whilst working in the workplace, below ground level, in confined spaces, at height, with tools and equipment, with materials and substances, with movement and storage of materials by manual handling and mechanical lifting

Maintenance

8 operative care of hand tools, portable power tools and ancillary equipment

Methods of work

9 application of knowledge for safe and healthy work practices, procedures and skills relating to the method and area of work and materials used to

9.1 identify and follow the installation quality requirements

9.2 measure and mark out areas to be strengthened

9.3 visually determine defects in concrete

9.4 identify asbestos and products that may contain asbestos

9.5 use equipment to sample dust and detect decay, damage, cracking, carbonation, reinforcement, corrosion, reinforcement cover

9.6 prepare and use chemicals to test concrete

9.7 carry out surface preparation

9.8 install carbon fibre wrap, carbon fibre plate, carbon fibre rod and aramid wrap composite strengthening systems

9.9 recognise and determine when specialist skills and knowledge are required and report accordingly

9.10 understand the specific requirements for structures of special interest, traditional build (pre 1919) and historical significance

9.11 work with, around and in close proximity to plant and machinery

9.12 use hand tools, portable power tools and equipment

9.13 work at height

9.14 use access equipment

10 team work and communication

11 needs of other occupations associated with installing composite strengthening systems

Problems

12 those arising from information, resources and methods of work

12.1 own authority to rectify

12.2 report unsafe work practices and environment

12.3 organisational reporting procedures

Programme

13 types of progress charts, timetables and estimated times

14 organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

16 materials, components and equipment relating to types, quantity, quality, sizes and the sustainability of standard and/or specialist

16.1 thinners, primers, adhesives

16.2 fittings and fixings

16.3 hand tools, portable power tools and associated equipment

17 confirm resources and materials conform with the specification

18 methods of calculating quantity, length, area and wastage of materials associated with the method and procedure to install composite strengthening systems

Security procedures

19 site, workplace, company, vehicles and operative

Install composite strengthening systems
