Wraps

1. electric blanket
2. parathermic foils
3. fabrics
4. plastic

Glossary

Absolute contraindication

An absolute contraindication is a condition that prevents the service from being carried out and may require referral.

Adverse reaction

An adverse reaction is an 'unexpected' reaction or outcome following a service, i.e. fainting

Anatomy and Physiology

How the skeletal, muscular, circulatory, lymphatic, respiratory, excretory, olfactory, limbic, digestive, endocrine and nervous systems interact with each other and how they impact the individual, service and outcomes.

Body type classification

Body types are identified as endomorph, mesomorph and ectomorph classifications.

Contra action

A contra-action is an 'expected' reaction or outcome following a service, i.e. erythema

Evidence-based practice

Evidence-based practice is based on the best available, current, valid and relevant evidence.

First aid

First aid can refer to first aid at work qualifications or equivalent and first aid mental health awareness.

Protocol

A protocol is a standard procedure to ensure best practice and compliance when providing services, i.e. follow manufacturer instructions.

Relative contraindication

A relative contraindication is a condition that requires an assessment of suitability for the service and/or if adaptations are required.
