
Overview

What this standard is about

This standard is about verifying the capability of suppliers to meet supply specifications. It deals with confirming the type of supplies and analysing information on supplier capabilities. It involves identifying problems, providing results and complying with procedures.

Who this standard is for

This standard is for supply chain practitioners. This could, for example be in purchasing, freight logistics operations or transport management roles.

Performance criteria

You must be able to:

P1 confirm the type of supplies that are required

P2 obtain information from suppliers on their capability to provide supplies

P3 analyse information on the capability of suppliers

P4 verify the information provided by suppliers

P5 identify any problems in using the suppliers

P6 provide the results to colleagues

P7 comply with procedures for verifying suppliers

Knowledge and understanding

You need to know and understand:

K1 analysis methods and procedures

K2 information sources on supply chain processes

K3 organisational objectives and activities

K4 presentation theories, models, and practices

K5 procurement theories, models, and practices

K6 supplier evaluation methods and procedures

K7 supply chain management theories, models, and practices
