

Collect, grade and prepare eggs for transport

Overview

This standard covers the collection, grading and preparation of eggs for transport to either a hatchery or for retail. Collection and grading can be carried out either manually or mechanically. This standard relates to a variety of systems and may include one or more of the following:

- Collecting and packing eggs ready to be taken to the grader or packing station
- Collecting and traying eggs ready to be taken for incubation and packing eggs unsuitable for hatching
- Collecting and preparing eggs to be graded on an on-line grader, where eggs are transported to the grader on a conveyor.

When working with livestock or machinery you should be trained and hold current certification, where required. This standard is suitable for those who collect, grade and prepare eggs for transport.

Collect, grade and prepare eggs for transport

Performance criteria

You must be able to:
