

## Overview

This standard is about how to handle and care for working animals to enable them to work safely. The type of work undertaken by the animal is not specified but it includes a variety of situations where individuals need to handle animals so that the animals' skills can be used to carry out tasks.

This standard is relevant for anyone who handles and cares for working animals.

When working with livestock or machinery you need to be suitably trained in line with current legislation and hold a relevant award, where required.

## Performance criteria

### *You must be able to:*

1.  
identify the hazards associated with handling and caring for working animals and assess the risks involved
2.  
carry out your work in accordance with the relevant environmental and health and safety legislation, risk assessment requirements, associated codes of practice and organisational policies
