

Overview

This standard is about the inspection, preparation and connecting of a solid fuel appliance up to 50kW to a domestic, or commercial flue ways or chimney services and systems designed to operate under negative flue pressure, those without internal electronic control systems and those not intended to be connected to plastic flue systems.

This will include the interpretation of current relevant statutory standards, information, and adopting safe, healthy and environmentally responsible work practices, selecting and using materials, components, tools and equipment, in accordance with the work area and the organisational procedures which are equal to or exceed the current statutory and legislative documentation and specifications

This standard is for people working in the occupational area of Chimney Occupations and can be used by operatives, supervisors and managers

A description of terms in bold font in this National Occupational Standard can be found in the Glossary which should be used as a reference point

COSVR825

Connect solid fuel appliances to flue system

Performance criteria

You must be able to:
