

Inspect vehicles used in waste management facilities

Overview

This Standard defines the competence required to carry out inspections on vehicles, including plant and tracked vehicles, used in the waste management industry. It involves assessing job related damage and wear and tear and whether it falls within acceptable limits. It requires an ability to maintain records and report the results of inspections as required by the organisation and, in particular, damage which could affect safety or effective operation. The inspections cover vehicles and associated ancillary equipment and tools. This Standard is for those whose responsibility it is to inspect vehicles and associated equipment on waste management facilities

Inspect vehicles used in waste management facilities

Performance criteria

You must be able to: Carry out inspections on vehicles, and associated equipment

1. select and use appropriate personal protective equipment (PPE) prior to commencing an inspection in accordance with the organisational procedures
2. ensure that risk assessment controls covering the vehicle inspection are met
3. carry out the vehicle inspection in accordance with manufacturers recommendations and the organisations inspection schedule
4. check the vehicle in accordance with organisational requirements
5. inspect the wheels for security and damage
6. check for damage, missing items or insecure body work or fittings that might affect the safe operation of the vehicle
7. check the fuel and windscreen wash levels and fill up the tanks if levels are too low for the days activities
8. check the levels of lubricants, cooling system fluid, and other fluid reservoirs
9. check that health, safety and amenity equipment fitted to, or in, the vehicle is in place and fit for service
- Use and communicate data and information connected with daily inspections
10. complete daily inspection reports in accordance with organisational requirements
11. record any corrective actions taken and report them to the

designated person

12. record and report any defects or damage found on vehicles and associated equipment in accordance with organisational procedures
 13. issue clear warnings to drivers where vehicles and associated equipment do not conform to safe operational requirements
 14. attach warning signs to vehicles that must not be moved as a result of identifying serious defects or where minor defects infringe transport legislation
- Resolve problems which arise from inspecting vehicles, plant and associated equipment
15. arrange with supervisor for defects to be rectified before vehicles are released for service
 16. advise your designated supervisor immediately when safety warnings or vehicle isolation measures are ignored by drivers or others
 17. inflate tyres to the correct operating pressure
 18. top up low fluid levels with the appropriate approved fluids and record
 19. report to supervisor any defect with which you are unfamiliar
 20. re-supply any missing health, safety and welfare consumables in accordance with organisational requirements
