

Manage customer service within a floristry environment

Overview

This standard covers managing customer service within a floristry environment. Managing staff training and development in relation to customer service, systems, equipment and technologies, organisational policies and procedures, current legislation and data protection relevant to the floristry environment. As well as managing consumer research, manage the pricing structures within the floristry environment and manage the development and delivery of floral designs which encompass the cultural and diverse needs of the customer.

The customers within this standard could be customers placing the floristry order direct with the florist, agencies involved in ordering on behalf of a client, the customer receiving the order but not directly placing the order.

This NOS is suitable for an Advanced Florist with some responsibility for staff.

Manage customer service within a floristry environment
